

## AURA Ironing table by Matic

### TECHNICAL SPECIFICATIONS

- 300 cm x 55 cm working surface
- Machine height: 85 cm
- Heating power: 2 kW
- Suction power: 2 motors x 0,55 kW
- 230V F + N / 60 Hz electrical voltage
- Complies with CE Safety manufacturing and safety standards

### FEATURES

- Rotary conveyor belt that is activated by photocell
- Working modes: Position 0: Steam, Position 1: steam and aspiration at the same time, Position 2: when the steam starts sucking
- Equipped with two photocells (front and back) to control the ironing belt
- Steam and aspiration time control using the push button on the iron
- Two vacuum motors
- Two fabric baskets (front and rear)
- Slanted ironing surface for easy pulling and ironing of the fabric
- Time control of steam and aspiration
- Steam lung
- Anti-fatigue iron support
- Ironing plate
- Lighting system

### ADVANTAGES

- Increased production thanks to the photocell activated rotary conveyor belt, forwards and backwards, easy tissue placement
- Inclined surface that facilitates ironing and inspection
- Heated work surface with temperature regulator and suction to leave the curtain dry and wrinkle free
- Steam and suction ironing, the suction time can be regulated, activated by push button
- Two separate motors for more powerful suction on the entire ironing surface
- Steam lung to always ensure dry steam on the iron, prevents condensation of water, does not wet the fabric
- Thanks to its ergonomic design and its characteristics, a non-expert operator can work obtaining an increase in production and a high ironing quality
- Easy to operate
