

J-25 D, Semi-automatic double Eyelet-machines

Eyelet-machine pneumatic, with double head and table, for setting of metal eyelets, up to 40 mm inner diameter.

Places eyelets and washers on all types of materials: textile, cardboard, canvas, PVC, etc. One head pierces the material, and the other head rivets the eyelets. Setting of oval eyelets is also possible. Never wrest the material.

Displacement of a head to regulate distances between eyelets. By changing dies, you can place eyelets and washers up to 40 mm inner diameter.

With stainless tray and guides to regulate the distance between eyelets. Laser pointer in option to locate the eyelets. Powered by pedal. With security system.

TECHNICAL DATA (with table):

Height: 141 cm

Width: 97 cm

Depth: 64 cm

Weight: 68 kg (pedal included)

Depth of work: 15 cm

Working pressure: 6 BAR

Performance: 900 hits/hour

Consumption: 4,5 l/stroke (per head) – 9 l in total
