

## **NYX COMPACT**

# **Automatic sewing system with conveyor belt for bottom and side hem on curtains, roman shades, panels, folding curtains**

**by Matic**

### **TECHNICAL SPECIFICATIONS**

- Double needle sewing head
- Conveyor belt synchronized with the sewing speed
- Conveyor belt length 2380 mm, width 800 mm
- Operation mode: manual, semi-automatic and automatic
- Electrical voltage 220 V
- Air pressure 5-6 bar
- Our machines comply with all EC safety rules

### **FEATURES**

- Touch screen control panel
- Quick change for the several sewing guides – no tools required
- Pneumatic guides to ease the fabric hemming and to hide the threads
- Automatic return of the sewn material
- Additional pedal to use conveyor belt independently from the sewing process
- Tilt table to adapt with an auxiliary table
- Rear driven roller to ease the guiding and feeding of heavy fabrics
- Led light at the sewing area
- Fabric box
- Needle cooling
- Maintenance notice
- Feeding and guiding device for hook and loop fastener\*

### **ADVANTAGES**

- Great solution for a small area. The size is only 4 m<sup>2</sup>, which is easy to place in any location
- High productivity and constant quality, thanks to the ergonomic design of the workstation in a stand-up position for the operator
- The pneumatic guides are custom made for each application – will be adapted to the production requirements, quick change of the guides

- Automatic return of the fabric on the conveyor belt when the sewing process is finished: faster production, less participation of the operator
- The conveyor belt synchronizes with the speed of the sewing machine, and is adjusted for light and heavy fabrics
- Fast and easy change of applications at the touch screen control panel
