- Information of operation status (operation hours) on the touch panel screen
- Maintenance notice

Cronos system with conveyor belt

- Additional pedal to use conveyor belt independently from the sewing process*
- Automatic return of the sewn material *
- Tilt table to adapt with an auxiliary table *
- Box for the fabric *

ADVANTAGES

- High productivity and constant quality, thanks to the ergonomic design of workstation for standing up position that helps the operator
- Needle distance 65 or 70 mm with cutter (Matic exclusivity)
- The guides are custom made for each application – will be adapted to the production requirements
- Rear driver roller- to ease the guiding and feeding for flat seams
- Fast and easy change of operation mode at the touch screen control panel

Cronos system with conveyor belt

- The conveyor belt synchronizes with the speed of the sewing machine – can be adjusted to light and heavy fabrics
- Automatic return of the fabric on the belt conveyor when the sewing process is finished: faster production, less involvement of the operator
- High productivity and constant flat seam quality with non-skilled operators
- Great solution for a small area, size of 4 m², it allows to place it at any location
- Fabric clamp system for the seam alignment of the curtain seam
- Fast and easy change of operation mode at the touch screen control panel
- This machine can be configured to do one or more applications, depending on the type of production or applications required.
