

## **PERSEO Automatic Impulse welding machine by Matic**

### **TECHNICAL SPECIFICATIONS**

- welding length of 4 or 6 meters
- 6, 10, 20, 25 mm electrode
- 100 programs for different jobs
- 40 groups of programs to automate operations and work in sequence

### **FEATURES**

- Motorized movement of the upper welding bar
- Intermediate stops and controlled lowering of the electrode for special jobs
- Adjustable electrode pressure on the touch screen. (ability to weld with different pressures)
- Colour touch screen
- Temperature regulator
- Welding and cooling time control
- Panel joining with automatic stop position
- Reinforcement welds with automatic stop position
- Electronic offsets of the movements for union, pockets, reinforcement ...
- Automatic pockets \*
- Guide to weld Zippers, Profiles ... \*
- Invisible welding (patented by Matic, patent number: 9.096.015)
- Programs for different applications and fabrics
- Programs to automate operations and work in sequence
- Remote LAN / Wi-Fi connection for after-sales service
- Industry 4.0 control and traceability of production\*
- Work area with led lighting\*
- FIXMATIC tape roll holder for welding PVC-free fabrics\*
- Front and rear tray prepared for heavy fabrics
- Adjustable in height
- Machine open on both sides
- 400/220 THREE PHASE
- No need for an air compressor

\* Optional
